TIPS FOR EVERY PATHWAY

 Use a computer Take the assessment on a laptop or desktop, not a phone or tablet. Use an up-to-date browser and a strong internet connection.	 Use your application email Sign in to HackerRank with the same email you used on your CodePath application. This is how we match your results to you.
 You get one try Retakes are not allowed. Start the assessment only when you are ready.	 Plan for the full time The timer starts when you begin and does not stop, even if you close the page. Find a quiet place and set aside your pathway's full time limit.
 Questions get harder as you go Start at the beginning and do your best on each question. You are not expected to finish everything.	 Work on your own Do not use AI tools like ChatGPT, Claude, or Gemini, and do not ask other people for help. Prompt-writing questions run inside HackerRank.

You do not need a perfect score.
 We look for some knowledge of the topics, not expert skills. That is what you will learn in the course!
